X-MET7500 Mining Analyzer

[Call for Pricing](#)

Laboratory grade results for mining and exploration professionals - in seconds! The X-MET7500 Mining Analyzer delivers the versatility of a laboratory, right there in the field.

The X-MET7500 comes with many great features:

- A large area, silicon drift detector (SDD), optimized for mining and soil applications
- Provides fast analysis, even when measuring light elements, coupled with detection limits down to 1ppm for important metals
- The handheld XRF Mining Analyzer allows fast and flexible custom calibration using on-site samples
- Offers significant savings in analysis costs, as samples can be measured on-site, immediately, with little or no preparation
- The X-MET7500 Mining Analyzer enables the user to combine GPS/GIS location data with analysis results for mine mapping
